b. After:

5. Shorten the written content to keep the reader's attention.
  - a. Before (one example):

MOBILE APPLICATION

# Bridge

Multimodal Communication for Accessible Learning

*An accessibility-focused mobile application designed to help children with speech and hearing difficulties communicate more easily through voice, text, sign language, images, and interactive storytelling.*

The project explores how multimodal interfaces and AI can make communication and learning more accessible for children with different communication needs.
