

Findings:

<i>Sr. No.</i>	<i>Finding</i>	<i>Triage</i>
01	It accepts a mistyped but syntactically valid address. Like example@gmai.com.	Known Limitation
02	Accepts garbage value as a message and sends it.	Fix now
03	No GitHub repo link shown for Atlas of architecture despite it being available on GitHub.	Fix now
04	Cannot go to a previous project's detailed info on the details page when I click view project.	Fix now
05	Forward for swipe for images unavailable for the image carousel for the detailed projects page.	Fix now
06	Images overlap when browser width decreases.	Fix now
07	Lighthouse finding search-index and network payload.	Known limitation

Evidence of findings:

1. It accepts an invalid email address. Like example@gmai.com.

Message:
hello

2. Accepts garbage value as a message and sends it.

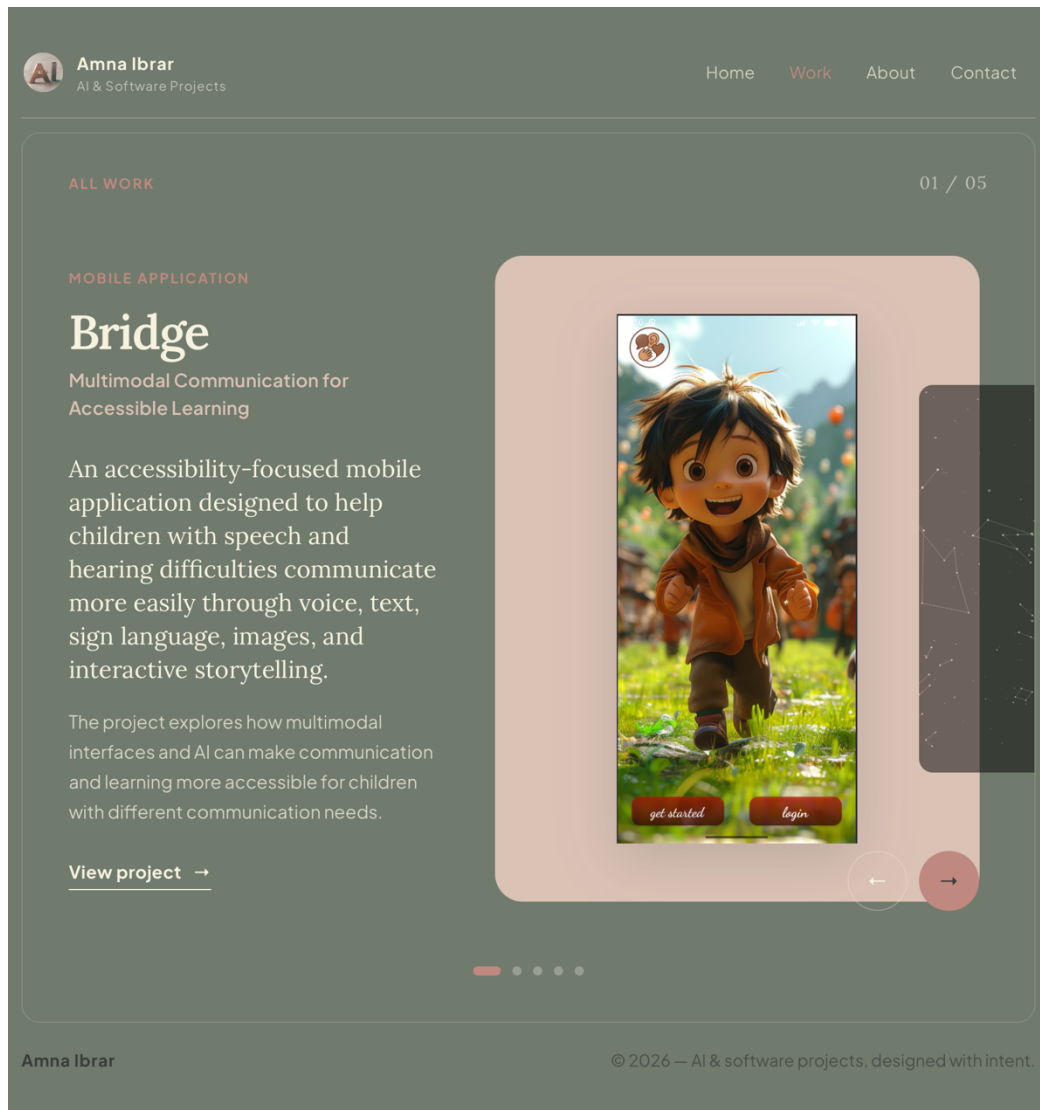

3. No GitHub repo link shown for Atlas of architecture despite it being available on GitHub.

4. Cannot go to a previous project's detailed info on the details page when I click view project.

5. Forward for swipe for images unavailable for the image carousel on a mobile screen.
6. Images overlap when browser width decreases.

Evidence of each of the findings addressed (with reference to serial number):

- 1 and 2 have been addressed by adding helper functions in the *App.jsx* file and the *send.js* file. The *submitform* function has also been updated. The evidence of the error handling is shown below:

Message is not meaningful ×

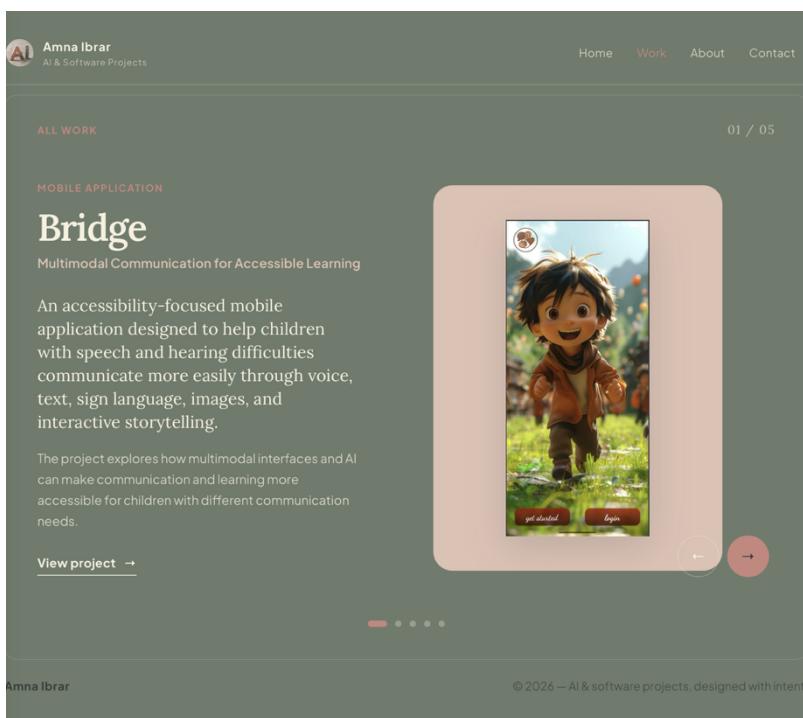

- 3 has been addressed by adding the repo link in the objects field in *App.jsx*.

- 4 has been addressed by updating the *App.jsx* to include the function for the back button as well. The HTML structure has also been updated. *App.css* has also been updated.

- 5 has been fixed by updating the current *css* and *jsx* code for the swipe function. It can be verified by visiting the website on the phone.
- 6 has been fixed by adding further *CSS* to override the earlier rules.

Findability Test:

The portfolio did not appear when I did a Google search despite achieving a Lighthouse SEO score of 100 (as shown above). The site has the required SEO metadata, but search-engine indexing is still incomplete.
