

Curated Image Set:

Hero visual (the color palette was provided to AI):

I started with this but didn't choose it because it looked quite ordinary.

Gemini then gave me this:

I liked it but something felt missing. So I got an idea and got it to generate this:

This however gave a fairytale feel and the first image I liked gave an impersonal feel so I combined the two resulting in:

AI didn't combine it properly and changed the colour so I generated it again with a different prompt.

I liked this so I asked it to generate icons respectively for the pages I plan to add to the website. This is for HOME:

This is for GET IN TOUCH:

This is for About Me:

This is for WORKS:

I chose AI for this so I could make what I use what I imagined. For the work section, like the mobile app I plan to show I've used the real app's screenshot as this needs to be authentic so I can showcase my work genuinely and transparently.
