

One line claim: Building practical AI solutions, bridging gaps and thoughts to functioning ideas.

Content Map: <https://www.figma.com/board/WwKruLidSlBeNQ5Pg7tH/Portfolio-Map?node-id=0-1&t=g4DGLKmkbfPDI99O-1>

Navigation logic: The portfolio is structured around four primary destinations: Home introduces the work, Case Studies provide evidence, About provides personal context, and Contact provides the primary conversion path.

Still need to gather list:

1. University Voice Assistant
 - a. Final architecture diagram
 - b. Screenshot of LiveKit voice interaction
 - c. Screenshot/video of chatbot answering a question
 - d. Screenshot showing citations/sources
 - e. RAG pipeline diagram
 - f. Scraper/RAG code repository
 - g. Live demo link, if available
 - h. Evidence of response-time testing
 - i. Evidence of retrieval/answer accuracy testing
 - j. Before/after examples from the scraping iterations
 - k. Final UI once the UX/UI phase begins
2. Other Case Studies (For each project):
 - a. Project screenshots
 - b. Problem statement
 - c. Key decisions
 - d. Outcome
 - e. Repository/demo
 - f. Relevant metrics
 - g. Before/after evidence
3. About / Contact
 - a. Professional profile photo
 - b. Professional email
 - c. Updated GitHub link
